REVIEW YOUR FUTURE SITE →

franklin-print-site.vercel.app

The prelude.

This mockup is a starting point, not a finished site — built from public information about the brand you've built over seventy-five years on Beverly Avenue. The design is fully custom; if you'd rather take it in a different direction, we start from yours.

The offer, in one breath.

A complete custom-coded website built specifically for Franklin Printing. No templates, no page builders, no monthly website-builder platform fees. Hand-written code that loads quickly and reads cleanly on every device — yours to keep.

RECENT LOCAL WORK

Modern Classic Barbershop & Shave Parlor — Zanesville, OH

modernclassicbarbershop.com

"Bill is amazing at what he does. If you can think it, he can do it."

— Michael Croston, owner · ★★★★★ Google review

Fitchin Auto Detail & Tint — Coshocton, OH

fitchindetailingandtint.com

"Bill has made 2 websites for me over the past few years. Great experience from start to finish."

— Eric Fitch, owner · ★★★★★ Google review

i.

What's included.

i. Custom Multi-Page Website

Home, services, gallery, about, contact — all built around Franklin's brand and story. Mobile-optimized, fast-loading, clean typography. Hand-written code that loads quickly on every device.

ii. Custom Quote Estimator

A guided four-step form where customers describe their project — type, quantity, timeline, files, contact. Pre-qualified projects come in with the details already filled out, so first calls start further along instead of "what do you charge?" A working version is visible in the mockup.

iii. Sample Work Gallery

Built into the site at no additional cost, ready to fill with photos of past work — business cards, brochures, QSL cards, specialty pieces. Structured so updates are straightforward through the optional care plan or by request after handoff.

iv. Hosting, Domain & Full Handoff

Hosting setup, domain configuration, and deployment — all handled. You own the code outright. If you ever take the site elsewhere, you're not locked into a proprietary platform.

Why custom code.

Most local businesses end up on Squarespace, Wix, or a website builder. That works until the platform raises prices, the template gets dated, or you want to move the site elsewhere — and suddenly you're stuck.

Custom-coded sites don't have those problems. No monthly platform fees, no template lock-in, no proprietary file formats. The site loads faster, reads cleaner, and stays yours regardless of who's maintaining it. For a site of this size, hosting can typically be kept very low-cost — in many cases free through platforms like Vercel. Domain renewal and any third-party tools would remain separate.

ii.

The investment.

ONE-TIME BUILD

Custom website,
full handoff

\$2,500

Everything in the four items previous. After deposit, we walk through your direction. Site is built, refined, and deployed. You own the code.

OPTIONAL • MONTHLY

Ongoing care

\$97/mo

Content updates, copy changes, image swaps, seasonal notices, minor adjustments. No surprise invoices, no hourly billing.

A few recommendations.

Not part of the proposal — just observations that could move the needle.

Google Business Profile

Could be optimized for local search — categories, services, photos, post cadence, review responses. Basic recommendations included with the build. Deeper local-search work can be quoted separately.

Automated review collection

Franklin currently sits at 13 Google reviews; competitors are well past 50. Every print job is a natural review moment — work delivered, customer happy, opinion fresh. A system that texts or emails customers a day or two after pickup typically converts 20-40% of them into reviewers. That's the difference between 13 reviews and 50-100 in a year. Happy to talk through what that would look like.

Social media presence

Even a few Facebook posts a week meaningfully improves how often the page reaches local customers. We can build it into a monthly content rhythm, or you can run it in-house — whichever fits how you already work.

The timeline.

DAY 0	Deposit received (\$1,250). Project starts. We schedule a call or in-person meeting to walk through your direction in detail.
DAYS 1-14	Build and refinement. I build the site, you give feedback, we refine. Typical timeline is 3-4 weeks from kickoff depending on feedback and approvals.
DAY ~21	Site goes live. Remaining \$1,250 is due before launch and handoff. You receive code, deployment access, and a brief written walkthrough.
ONGOING	If you opt into the \$97/month care plan, edits and updates start the month after launch. Otherwise — you have the code, and the site is yours.

WHAT YOU OWN

Domain, website code, hosting account, deployment access — all in your name, owned by you. You're never locked in to working with me. You can take everything elsewhere any time.

PAYMENT TERMS

\$1,250 deposit to begin. Remaining \$1,250 due before launch and handoff. Optional \$97/month care fee starts the month after launch — cancel anytime, no contract or termination fee. Payment by Stripe, Venmo, Zelle, Cash App, cash, or check.

Ready to begin?

Send the \$1,250 deposit to start, or reply to bill@designedtoelevate.co to schedule a kickoff call first. Either way, I'll be in touch within the day.
